Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 28 October 2005.

DETAILED ACTION

Response to Amendment

1. The amendment filed on October 28, 2005 has been entered and made of record.

Response to Arguments

2. Applicant's arguments filed have been fully considered but they are not persuasive. Applicant argues "There is nothing in Toyoda 6,229,884...that teaches or suggest determining if certain electronic data is present on a storage device after an interruption in electrical power and then resuming or restarting the transmission of the electronic data if the electronic data is determined to be present on the storage device after the interruption in electrical power." Upon further review, the Examiner finds this limitation to be taught in Col 10 Lines 5-29. Toyoda determines if the electronic data is present on the storage device by sending out the responsive email to be received by the computer in the case of an interruption in electrical power (transmission failure). After this notice has been received, the transmission of the electronic data is then resumed.

See Fig 26.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1,6,8,11,13,19 are rejected under 35 U.S.C. 102(e) as being anticipated by Toyoda et al (US 6,229,884)

Regarding claim 1, which is representative of claims 8 and 13, Toyoda teaches in a system for electronically transmitting to an electronic mail (e-mail) server electronic data derived from optically scanning a document, a method for recovering from an interruption in electrical power causing a failure in the complete transmission of the electronic data to the e-mail server, the method comprising: storing the electronic data to a non-volatile storage device (5:40-42); transmitting the electronic data to the e-mail server (5:37-59); removing the electronic data from the storage device after the electronic data has been completely transmitted to the e-mail server (7:39-56); determining if the electronic data is present on the storage device after the interruption in electrical power; and if the electronic data is determined to be present on the storage device after the interruption in electrical power, resuming the transmission of the electronic data to the e-mail server or restarting the transmission of the electronic data to the e-mail server (10:5-29).

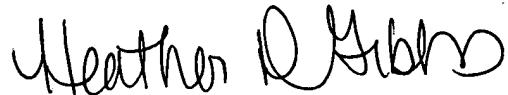

For claims 6,11,19, Toyoda teaches including a confirming receipt of all of the electronic data by the e-mail server (10:30-40).
